

**Summary of Changes to Generation Capacity (MW) in Texas By Status and Resource Type (updated 01/06/2023)**

Status	Biomass	Coal	Nat. Gas	Nuclear	Solar	Storage	Wind	Hydro	DFO	Total
<b>Completed Since 1995</b>	244	4,523	50,623	299	9,469	2,040	35,420	24	-	<b>102,642</b>
<b>Announced</b>	-	-	3,790	-	23,686	6,949	8,123	-	-	<b>42,547</b>
<b>Retired Since 2002</b>	51	5,531	17,669	-	-	2	370	2	11	<b>23,636</b>

**Notes**

1. Data used in this report is compiled from various public sources, including ERCOT reports.
2. Wind and solar capacity values have not been adjusted for Effective Load Carrying Capability or historical performance.
3. There is no assurance that an "Announced" project will be built. For purposes of this report, Staff attempts to update the status of Announced projects as information becomes available.
4. "Biomass" includes landfill gas and wood products. "Coal" includes coal, lignite, and petroleum coke. "Storage" includes battery storage and compressed air energy storage (CAES). "Other" includes fuel oil and hydro.
5. Abbreviations: CAES - compressed air energy storage; DFO - distillate fuel oil; NG - natural gas; NUC - nuclear; Petcoke - petroleum coke; SPR - ERCOT System Planning Report; CDR - ERCOT Capacity Demand Reserve Report; GIS - ERCOT Generator Interconnection Status Report; TCEQ - Texas Commission on Environmental Quality.
