Hi Robert,

Oncor is the founding member of the Texas Electric Delivery Alliance and TRII. For more info, please see the launch release here:

- <https://texansforresponsibleinfrastructureinvestment.com/new-statewide-coalition-launches-to-advance-the-grid-texas-needs/>

Oncor has an obligation to serve all of the retail electric customers in our service territory and agrees that the Permian Basin urgently needs substantial new transmission investment – including the 765 kV transmission lines to import more power to the region – in light of insufficient amounts of dispatchable generation being planned for the region in the foreseeable future. For more info, please see the facts section of the TRII website here:

- <https://texansforresponsibleinfrastructureinvestment.com/#facts>

Sincerely,

Andrew Clark
