

AEP-CPS Howard to Solstice

TPWD Property Name	County	Priority* (1 = Highest Priority)	Sensitive Asset	Reason for Designation as Sensitive	Recommended Setback Buffer (Miles)
Silver Lake State Park	Edwards, Kinney	1	Silverlake Developed Area: Park Headquarters and Dutch Waterhole Scenic View	High-use for all visitors, Scenic view site	5 miles from Dutch Waterhole and the High Terrain around the waterbody known as Silverlake
Silver Lake State Park	Edwards, Kinney	1	Northernmost Area of Park	Backcountry Wilderness Area, viewshed impacts would be particularly noticeable and dramatically affect visitors’ experience.	Minimum of 0.25-mile buffer from boundary
Silver Lake State Park	Edwards, Kinney	1	Lost Creek Natural Area	Scenic Natural Area with potential for high visitation for trail point of interest, primitive and group camping. Impacts would impact large proportion of visitors	Minimum of 0.25-mile buffer from boundary
Bear Creek State Park	Uvalde	1	Park Development Area on Southern Boundary.	Southern Portion of park property where the future park headquarters, trailhead, campgrounds and historic areas will be constructed. Alignment will be visible from primary Ridgeline Scenic Viewpoint	5 miles from Scenic Viewpoint on Ridgeline dividing Bear Creek State Park (about 2.5 miles from southern boundary).
Bear Creek State Park	Uvalde	1	Ridgeline Scenic Overlook	Primary Scenic Overlook that offers 360 view of both the Frio River Valley and Bear Creek valley.	5 miles from Scenic Viewpoint on Ridgeline dividing Bear Creek State Park (about 2.5 miles from southern boundary).
Garner State Park	Uvalde	2	Old Baldy Scenic Overlooks and Trail System	Scenic View Site. One of the most popular hiking trails in the State Park involves a hike up to a unique land formation known as “Old Baldy,” which is a historic overlook in Texas	5 miles from scenic viewpoint towards the south.
Lost Maples State Natural Area	Real	2	Lost Maples Scenic Overlook and Trail System	The SNA has one of the most visited scenic overlooks in the state, known for the unique colors of Sabinal canyon and the Lost Maples.	5 miles from primary Scenic Overlook of the famous “Lost Maples” viewing experience.
Devil's River State Natural Area- Dan A Hughes Unit	Val Verde	2	Entrance Road and Arrival Experience to SNA	Devils River SNA is considered one of the most pristine and natural sites in Texas. There is potential for visitors to see the transmission line as a significant part of their arrival experience.	5 miles from park access point.
Devil's River State Natural Area- Del Norte Unit	Val Verde	2	Scenic Views along Newton Trail and 12-mile Loop River Trail System	Devils River SNA is considered one of the most pristine and natural sites in Texas. There is potential for visitors to partially see the transmission line multiple times along the trail to a scenic overlook along southern boundary.	5 miles from SNA boundary.
Devil's River State Natural Area- Del Norte Unit	Val Verde	1	Paddler Campground	The Devils River Campsite experience would be negatively impacted if transmission lines are visible from river or nearby ridgetops along adjacent river experience.	1.5 miles from Campground Area.
Devil's River State Natural Area- Del Norte Unit	Val Verde	2	Paddling Trail	A 765k Transmission line crossing the Devils River between the two SNA units will negatively impact a portion of Devils River known as one of the most pristine in Texas, not having been impacted by human development.	Recommend avoid crossing Devils River between the two SNA Units.
Hill Country State Natural Area	Bandera, Medina	3	Twin Peaks Scenic Overlook	This is a primary scenic point located centrally within the park property and offers unique 360-degree views across property. Current alignment would be partially visible depending on exact location of the park visitor along the trail system.	0.25-mile from ridge lines along CR 470.
Devils Sinkhole State Natural Area	Edwards	3	Devils Sinkhole (Feature)	The primary public use area are multiple scenic views around the geological feature known as Devil’s Sinkhole, home to one of the large bat colonies in Texas and best opportunities for visitors to experience their emergence from the Sinkhole. 765k Proposed alignments are likely to be visible from viewing area, road and trail system.	5 miles from Public Use Area at Devils Sinkhole.
Kickapoo Cavern State Natural Area	Edwards, Kinney	3	Armadillo Lookout	Scenic View Site: Primary overlook within SNA known for its natural beauty and limited development.	5 miles from Armadillo Lookout

*Priority - The assigned number (1 through 3) indicates the relative expected degree or intensity of impact on visitors’ experience.

LCRA Bell County East - Big Hill Proposed 765kV Transmission Lines

TPWD Property Name	County	Priority* (1 = Highest Priority)	Sensitive Asset	Reason for Designation as Sensitive	Recommended Setback Buffer (Miles)
Post Oak Ridge	Lampasas and Burnet	1	Headquarters (HQ) and Trailhead - <i>Proposed</i>	High visitation, Scenic view site along "Post Oak Ridge", a unique geological feature and old growth woodland with distant views over Colorado river valley	5 miles from southern boundary of Post Oak Ridge SP
Post Oak Ridge	Lampasas and Burnet	1	Post Oak Falls Overlook - <i>Proposed</i>	High Visitation, multiple scenic overlooks of "Post Oak Falls", an iconic waterfall that will be main feature of park	5 miles from ridgeline above Post Oak Falls. (5 miles from southern boundary)
Post Oak Ridge	Lampasas and Burnet	2	Yancey Creek Overlook - Proposed	Modest visitation, area includes multiple scenic overlooks of "Yancey Creek", a pristine Hill Country Creek of state-wide significance.	5 miles from Yancey Creek centerline
Colorado Bend	San Saba and Lampasas counties	1	Gorman Falls Overlook	High Visitation, multiple scenic overlooks of "Gorman Falls", an iconic waterfall that is a main feature of park	5 miles from ridgeline above Gorman Falls
Colorado Bend	San Saba and Lampasas counties	1	Tie Slide Overlook	Modest Visitation, a scenic overlook along high cliffs of Colorado River", an iconic and distant view	5 miles from scenic point
Colorado Bend	San Saba and Lampasas counties	2	Headquarters (HQ) - <i>Current Project</i>	High Visitation, future headquarters and visitor center location, with distant views over the larger Gorman creek watershed and Colorado river basin.	5 miles from proposed building location

*Priority - The assigned number (1 through 3) indicates the relative expected degree or intensity of impact on visitors' experience.

Oncor Dinosaur Switch to Longshore Switch Proposed 765kV Transmission Lines

TPWD Property Name	County	Priority* (1 = Highest Priority)	Sensitive Asset	Reason for Designation as Sensitive	Recommended Setback Buffer (Miles)
Dinosaur Valley SP	Lampasas and Burnet	1	Dinosaur Tracks in Paluxy River and Trailhead	High visitation, Icnoic views along "Paluxy River and surrounding hillside at the famous dinosuar track and fossil site, a unique feature of state-wide significance	~1.75 miles from Trailhead Parking Areas along river. The high terrain surrounding the park on eastern boundary would screen the transmission line if placed on other side of Hereford St.
Dinosaur Valley SP	Lampasas and Burnet	1	Scenic Overlooks along eastern and northern trail systems-	High Visitation, scenic overlooks of Paluxy river and trail system on ridgelines along southeast and northern boundary.	~0.75 miles from eastern boundary. The high terrain surrounding the park on eastern boundary would screen the transmission line if placed on other side of Hereford St.
Dinosaur Valley SP	Lampasas and Burnet	2	Headquarters and Entrance	High Visitation, Alignments along the southern park boundary will be seen at the park entrance and headquarters, and will then be seen throughout their experience on roads and trails.	~ 0.5 miles from southern boundary. The negative impacts to visitor experience at entrance, headquarters and visitor areas would be lessened if alignment was placed on lower terrain along southern boundary along County Road 205, because higher elevated terrain would screen the park.
Dinosaur Valley SP	Lampasas and Burnet	2	Campground	High visitation area, main campground. Night-time views are important to protect and want to avoid any lighting fixtures.	~ 0.5 miles from southern boundary and 0.75 miles from eastern boundary. The negative impacts to visitor experience would be lessened if alignment was placed on lower terrain along County Road 205 and Hereford St. Higher elevated terrain would screen the park from proposed alignments.
Abilene State Park	Taylor	3	Boundary	Park Management and Operation Considerations. <i>Proposed alignments may be partially visible from parts of trail system and road. However, the visitor experience and views are directed to the south and around the lake, and proposed alrignments are not anticipated to have a major impact on visitors to park.</i>	0.25 miles from boundary
Paul and Toni Fox Burns WMA	Brown	3	Boundary	Wildlife Management and Operation Considerations	0.25 miles from boundary
McGillivray and Leona McKie Muse WMA	Brown	3	Boundary	Wildlife Management and Operation Considerations	0.25 miles from boundary

*Priority - The assigned number (1 through 3) indicates the relative expected degree or intensity of impact on visitors’ experience.
