Subject: Strengthening the UT Student Experience

The University of Texas at Austin Office of the President

Dear Enrollment Management and Student Affairs Staff,

How we serve students defines our character. We have a responsibility to care for every Longhorn — from the moment they apply for admission to the day they walk across the stage at graduation. A vast number of programs, services, and resources shape our students' lives and support their success. I am excited to announce that we are launching a new vision that will integrate these efforts and build a more seamless experience for all students.

Miguel Wasielewski will lead this work as UT's first Vice President for Student Experience, effective today. In this cabinet-level role, he will oversee Texas Student Experience, an expanded portfolio that brings together key areas of student support, including the Division of Student Affairs and Strategic Enrollment Management. Over the coming months, Miguel will work closely with John Dalton — and with many of you — to shape the portfolio's structure and strategy. I want to thank John for his dedication and collaboration and his strong support of this transformation. I look forward to sharing more details and rolling this out more formally later this summer.

Miguel has spent more than three decades serving students at this University across financial aid, admissions, and strategic enrollment management. He understands how students access a UT education, how they navigate the enrollment process, and how they succeed throughout their time on campus. Miguel also understands the student experience on a personal level as a first-generation college student, a UT graduate, and a Longhorn parent.

This is an exciting step forward for our University. We are building an environment of student support that puts students at the center, while our teams work in stronger, more collaborative ways to meet their needs and help them thrive.

Please join me in thanking Miguel for accepting this responsibility and welcoming him to this new and important role.

Hook 'em!

Jim Davis
President
