Good afternoon, Robert,

Here is our statement:

As we can all agree, Texans expect and deserve a better energy future, and CenterPoint Energy is committed to building a more resilient, reliable and affordable energy future for all our Texas customers, communities, local industries, and small businesses. We remain focused on meeting our customers' future energy priorities, which include strengthening and modernizing the electric grid, mitigating the effects of more powerful storms and extreme weather, and meeting the area's growing energy and economic needs, while keeping our part of the bill as low as possible. Whether it's our Greater Houston Resiliency initiative (GHRI) efforts or other critical grid and infrastructure investments, they are vital to our state's energy future, important for our customers, and are built by our fellow Texans to benefit Texans and Texas communities.

Some people who received this message don't often get email from rmontoya@texasscorecard.com. [Learn why this is important](#)

Please be advised Haverlah's numbers were for CenterPoint Houston.
